Objective

IT professional with 2+ years of experience in software development, analysis, design, implementation, and maintenance of application software in a Web-based environment. Having experience primarily with frontend technologies like ReactJS, and Redux. Well-experienced in Scrum and Agile methodologies.

Experience

- **Edstem Technoloies**   02/06/2021 -
  Software Engineer

Skills

- ReacJS
- LWC
- MySQL
- Javascript
- Bootstrap
- HTML5
- CSS3
- GitHub

Projects

- **Bloom Console (Edstem Technologies) -**
  Developed an internal project for the HR team, consisting of various features including employee onboarding, employee management, project management, timesheet entry, leave management, and tech desk. Implemented a micro- frontend architecture using the qiankun library. Designed and developed the employee management feature as a standalone micro-frontend application, allowing HR to view and manage employee details, including onboarding new employees.Utilized ReactJS for front-end development, ensuring a responsive and intuitive user interface.Deployed the application to AWS and leveraged the AWS S3 bucket to securely store uploaded documents.

- **OneDoorWay (Australia) -**
  Developed and maintained a website for managing purpose-built specialist accommodation facilities, catering to individuals with high support and complex care needs. Implemented client details management, including family information, therapy details, NDIS support, budget, and transport information.Created a user-friendly interface for support workers to enter daily reports, allowing them to log activities, observations, and progress. Utilized the ReactJS stack with styled-components as the styling base, ensuring a responsive and visually appealing user interface.Implemented reusable components to enhance code reusability and maintainability. Conducted unit testing and tried to implement test cases to ensure the reliability and stability of the website.

- **Woodside Design Portal (Telstra, Australia) -**
  Successfully
  developed a web application with a robust Content
  Management System (CMS) to handle data management
  and facilitate the creation, management, and updating of
  content in the front end. Implemented reusable
  components, reducing development time and improving
  code maintainability. Worked with the ReactJS stack. Utilized styled-components as the styling base to create
  visually appealing and responsive user interfaces.

- **Mattsco supply (US) - Quotation management web app**
  As a UI Developer, I spearheaded a dynamic project encompassing diverse components:

  1. Email, Invoice, and Buy/Sell Components:
     - Developed responsive UIs for email composition, invoice creation, and buy/sell operations.
     - Integrated APIs for efficient data exchange, ensuring seamless functionality.

  2. React Styled Components and Code Modularity:
     - Utilized React Styled Components for modular, maintainable code.
     - Implemented reusable components, reducing development time and ensuring scalability.

  3. Responsive UI Design and User Experience:
     - Prioritized responsive UI development for optimal user experiences across devices.
     - Ensured logical API integrations, enhancing data flow between components.

  Key Accomplishments:
  - Contributed to robust and responsive interfaces for email, invoice, and buy/sell functionalities.
  - Successfully implemented logical API integrations, improving overall system efficiency.

  Technical Skills:
  - Front-end Development
  - React Styled Components
  - API Integration
  - Responsive UI Design
  - Code Modularity and Reusability

Education

- **Kerala technological University**   2019
  Btech in Computer science and engineering
